Education

University Of Ottawa

Sep. 2022 – May 2026

Bachelor of Science in Computer Engineering

Ottawa, Ontario

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

Qinvst

Septmeber 2024 – January 2025

Web developer Intern

Ottawa, Ontario

- Designed and implemented responsive frontend UI components using structured design principles, translating business requirements into scalable web interfaces.
- Integrated backend APIs for data processing and user authentication.
- Created use cases to guide feature development and performed regression and bandwidth stress testing.
- Used Jira to track tasks and manage sprints.

Snappy Tech, Inc

August 2021 – January 2023

Computer Technician Intern

Ottawa, Ontario

- Assisted in development of the front end of a mobile application for iOS/Android using Dart and the Flutter framework.
- Worked with Google Firebase to manage user inputted data across multiple platforms including web and mobile apps.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Assisted staff in other technical projects, gaining hands-on experience in software and hardware.

Projects

VI Glasses | *Python, C, C++, I2C*

January 2021

- Designed a wearable assistive system integrating ultrasonic and light sensors with microcontroller-based processing for real-time obstacle detection.
- Implemented I2C and UART communication for synchronized sensor data acquisition and system control.
- Performed hardware bring-up and lab debugging using oscilloscopes and DMMs to validate signal integrity and timing.
- Developed signal processing logic and conducted system-level validation under varying operating conditions .

Shell Eco Marathon- uOttawa Sponsored Car Racing Team | *Java, C++, C, Clion, STM32*

November 2020

- Designed and built a functional telemetry system of the vehicle integrated into their embedded systems. .
- Developed the telemetry system in C/C++ for real-time data monitoring, used their makefiles.
- Integrated a speedometer using magnets and sensors, calculating speed and displaying data via CLion IDE.
- Delivered a modern fully functional vehicle with enhanced performance for competition.

UART Communication System | *VHDL, Verilog, Quartus Pro, RTL*

October 2020

- Designed and implemented a RTL UART system using VHDL, including both transmitter and receiver components .
- Built on a Finite State Machine FSM lab project to enhance understanding of structural and behavioral design .
- Developed and debugged key UART components, such as the TDR register and transmitter controller, to handle 8-bit data transmission .
- Gained insights into low-level hardware design and communication systems through overcoming design challenges.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio

Technologies/Frameworks: Linux, Jenkins, GitHub, JUnit, WordPress

Leadership / Extracurricular

IEEE uOttawa Student Section-CEGSC

November 2025 – Present

Vice Chair

University of Ottawa

- Achieved a 4 star fraternity ranking by the Office of Fraternity and Sorority Affairs (highest possible ranking).
- Managed executive board of 5 members and ran weekly meetings to oversee progress in essential parts of the chapter.
- Hosted QNX raspberry Pi 5 workshop for student.
